ELECTRIC

What can you say about a band that has been together since 1986? Plenty. While many bands come and go after a few years, Truffle is in it for the long haul. They are players and entertainers; it's what they do and enjoy with a passion! Their travels have taken them to all but ten of the United States; they tour the New England region constantly, and perform annually in the U.S. Virgin Islands.

The on-going list of international acts they have supported is huge: Dave Matthews Band, Little Feat, Phish, The Band, Widespread Panic, The Radiators, Blues Traveler, Buckwheat Zydeco, Spin Doctors, Arlo Guthrie, Merl Saunders, Baba Ulatundje, New Riders, and Toots & the Maytalls. They have released five full-length albums as well as numerous compilations. Their latest is a new studio release, *That's Right* (May 2005). Roots and soul music with strong songwriting makes for a truly unique Truffle sound all their own.

**"Truffle is musically tight, their lyrics are inspired and they do not rely on gimmicks for appeal. Instead, Truffle offers songs with the listener in mind—songs that have been masterfully crafted and arranged."**

*Showcase,  
Foster's Daily  
Democrat*

**"The new CD *That's Right*" is vintage Truffle all the way. It reflects a band that has not only established a strong identity, but shows continued growth and maturity."**

*The Wire Magazine*
